

Practice: Exploring Reports Published on JMP Public

In this practice, you explore results for the Measles data that have been published to JMP Public.

1. In a browser, go to **public.jmp.com**.
2. Use the search field to search for the reports containing the word *Measles*. Open **Incidence of Measles**.
3. Click the **Run Charts** report.
4. In the Local Data Filter, select only the first three states. Compare the Measles Cases per 100,000 over time for these three states. What do you learn?

Alabama had lower measles rates overall than the other two states. The first reported data for Alaska were in 1954. After 1971, the measles rates for all three states were extremely low.
