

To complete the practices in this course, you can use JMP in a Virtual Lab.

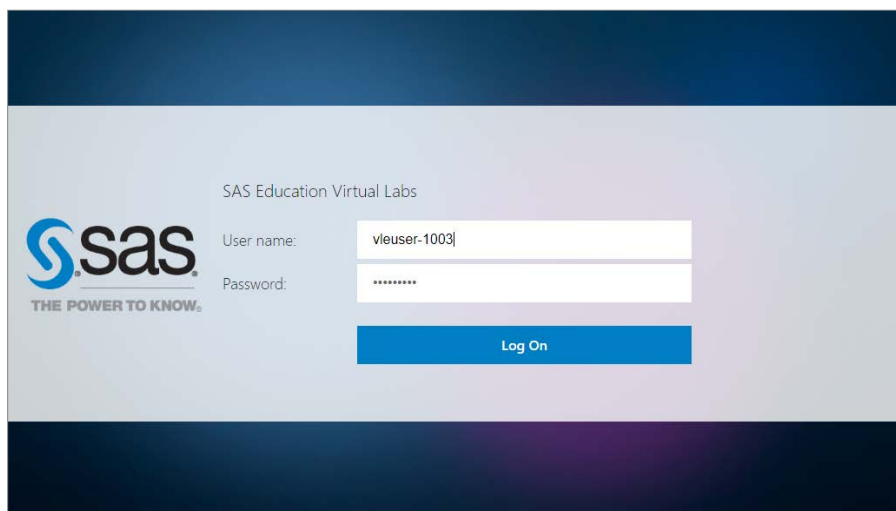

1. The data you'll use throughout the course data is automatically loaded into the Virtual Lab. However, to make sure that the course data folder has been correctly loaded, click **Refresh Your Data** in the JMP Virtual Lab block on the right side of the main course page:

2. To access the Virtual Lab, click **Launch Virtual Lab** in the block on the right side of the main course page:

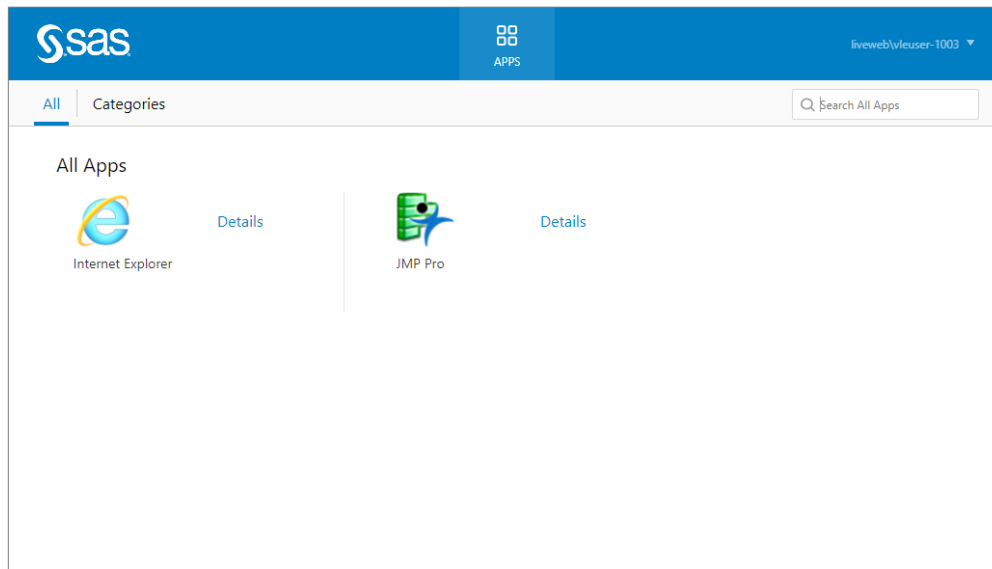

The SAS Education Virtual Labs is displayed. The **User name** and **Password** fields are already filled in for you. Do not change these values.

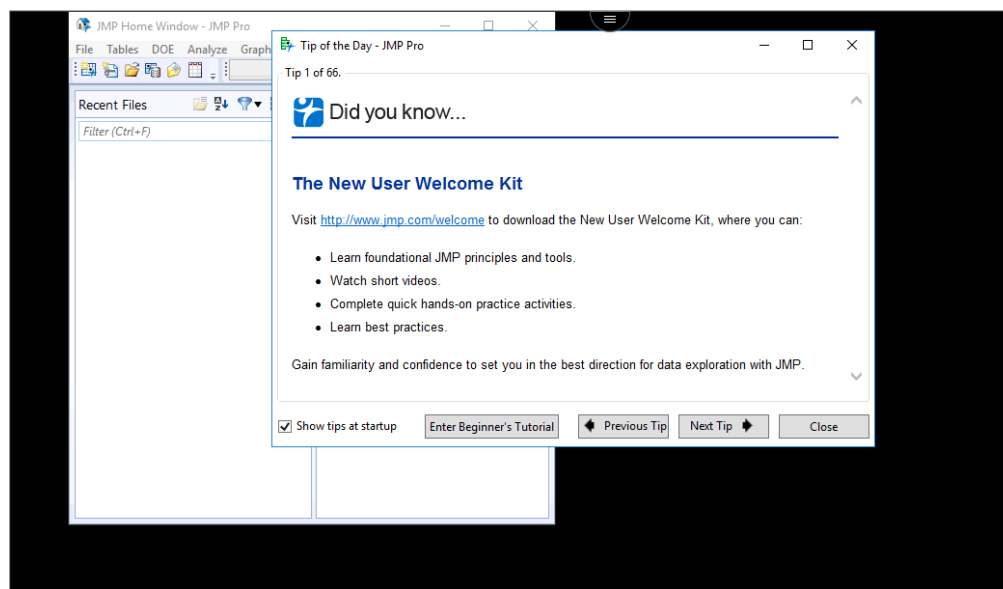

3. Click **Log On**.

The APPS window is displayed.

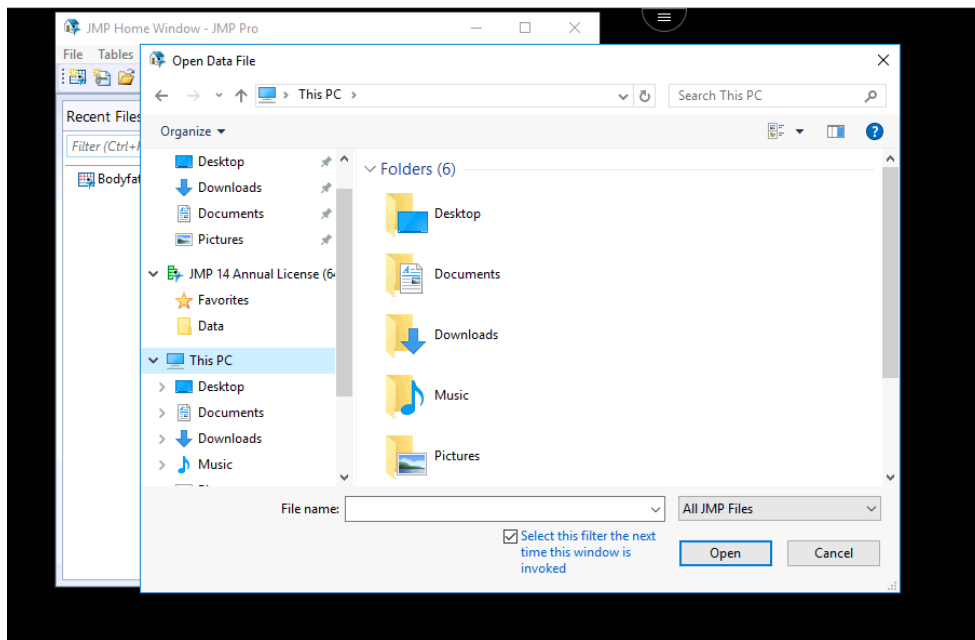

4. Click the **JMP Pro** icon.
JMP Pro and the JMP Tip of the Day are displayed in a new browser tab.

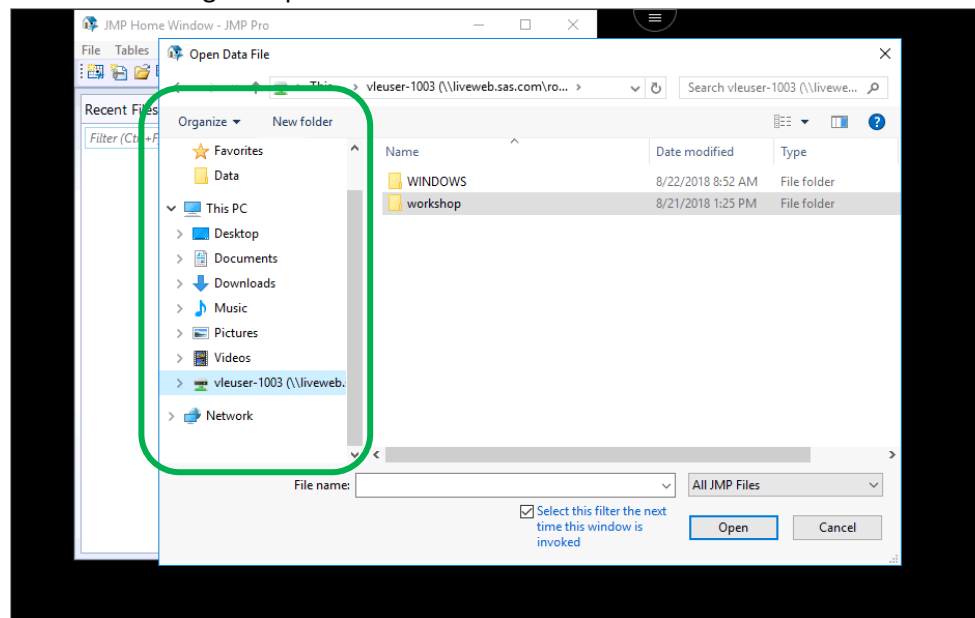

5. Click **Close** in the Tip of the Day window.
 - If you want, you can also clear the **Show tips at startup** box before you close the window.
6. To access practice files, select **Open** from the **File** menu.

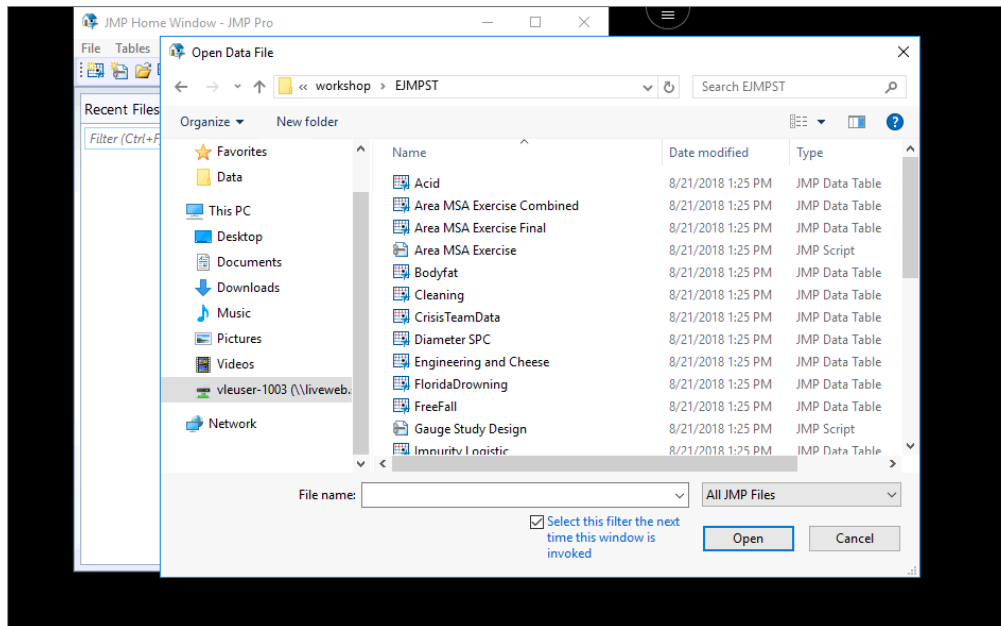

The Open Data File window is displayed.

7. Use the navigation panel on the left to scroll down and select the **vleuser** drive.

8. Open the **workshop** folder and then the **EJMPST** folder.

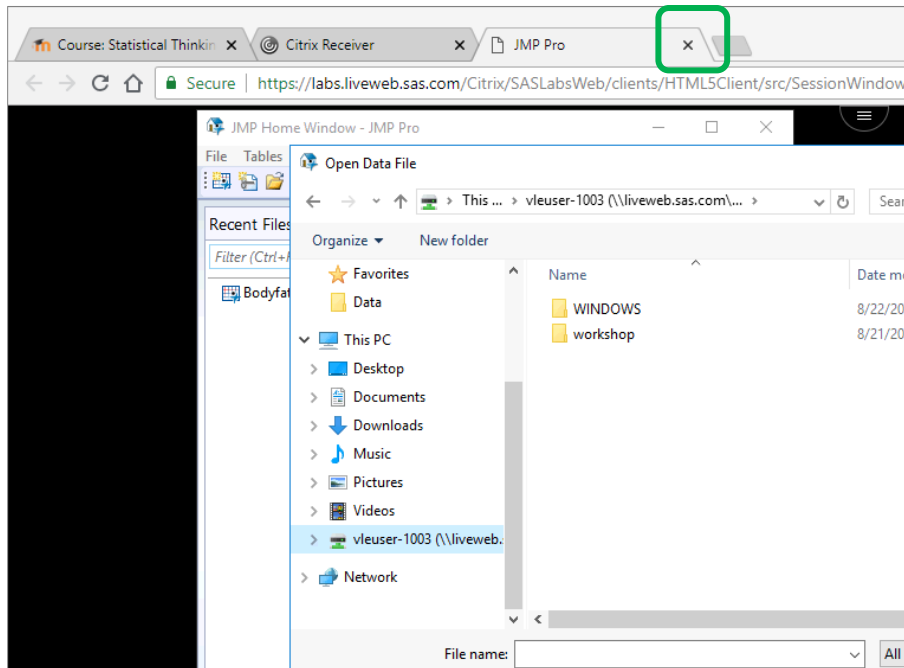

You're now ready to use JMP!

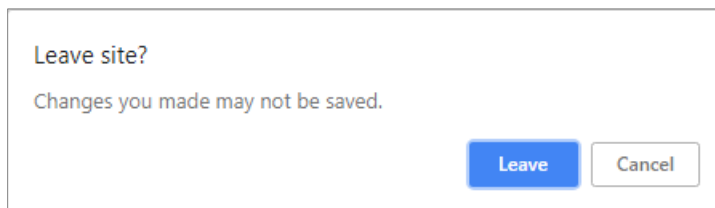

The next time you use JMP in the Virtual Lab, you should be directed to this folder.

Note: To complete the practices, you can toggle back and forth between this browser tab and the practice window. Alternatively, you can arrange the windows side by side on your monitor, as shown below.

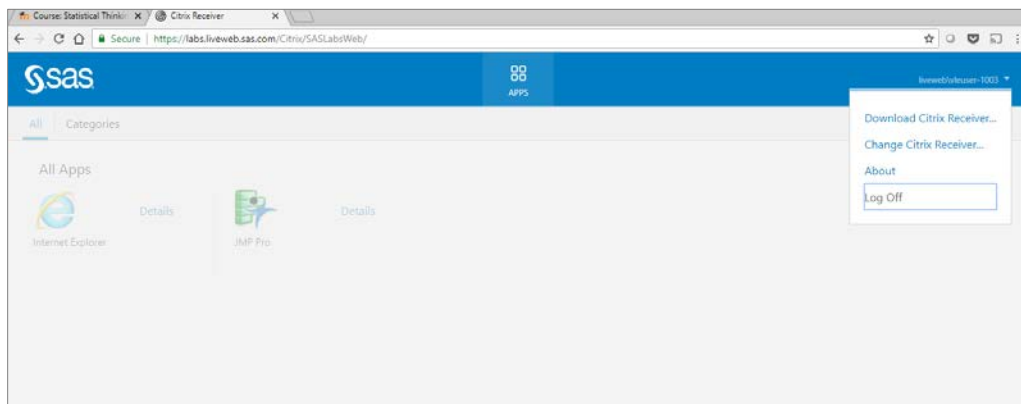

9. To exit the Virtual Lab, first close the browser window by clicking the **X** on the tab.

10. Click **Leave** to confirm that you want to close the virtual lab.

11. Select **Log Off** in the APPS window.

12. Finally, close this browser window by clicking the **X** on the tab.
