

Lesson 1: Multiple Linear Regression

Using PROC GLMSELECT to Build a Multiple Regression Model [2:45](#)

 Building a Multiple Regression Model [12:18](#)

Question

Common Regression Problems [4:35](#)

Question

Simple Polynomial Regression

Introduction [0:50](#)

Objectives

Polynomial Regression Models [1:35](#)

Question

Scenario: Building a Simple Polynomial Regression Model [1:14](#)

PROC SGPLOT [1:32](#)

EFFECT Statement in PROC GLMSELECT [1:49](#)

 Building a Simple Polynomial Regression Model [14:27](#)

Objectives

In this section, you learn to do the following:

- do an initial exploratory data analysis using PROC SGPLOT
- fit a polynomial regression model
